## New England Roadside Matrix Wet Meadow Seed Mix

Botanical Name	Common Name	Indicator
Elymus riparius	Riverbank Wild Rye	FACW
Festuca rubra	Creeping Red Fescue	FACU
Elymus virginicus	Virginia Wild Rye	FACW-
Bidens aristosa	Tickseed Sunflower/Bur Marigold	FACW
Panicum dichotomiflorum	Smooth Panic Grass	FACW-
Panicum virgatum	Switch Grass	FAC
Cornus amomum	Silky Dogwood	FACW
Verbena hastata	Blue Vervain	FACW
Carex lurida	Lurid Sedge	OBL
Carex scoparia	Blunt Broom Sedge	FACW
Helenium autumnale	Common Sneezeweed	FACW+
Viburnum dentatum	Arrow Wood Viburnum	FAC
Asclepias incarnata	Swamp Milkweed	OBL
Aster novae-angliae	New England Aster	FACW-
Eupatorium maculatum (Eutrochium maculatum)	Spotted Joe Pye Weed	FACW
Eupatorium perfoliatum	Boneset	FACW
Agrostis scabra	Rough Bentgrass/Ticklegrass	FAC
Scirpus atrovirens	Green Bulrush	OBL
Sambucus canadensis	Elderberry	FACW-

PRICE PER LB.     \$57.00  
 REQ. QUANTITY:   1 LBS.  
**TOTAL**             \$57.00

APPLY: 35 LBS/ACRE  
           1 LB/1250 SQ FT  
 MINIMUM QUANTITY: 1 LBS

The New England Roadside Matrix Wet Meadow Mix is a specialty mix designed for use along roads and highways. The mix is unusual in that it contains native grasses, wildflowers and shrubs that are blended together as a native matrix seed mix. In areas that receive frequent mowing, the grasses will dominate, such as those areas

closest to the roadway shoulder. In areas farther from the road, which may be mown only once each year, or in hard to mow areas, such as around sign posts, the wildflower component will become dominant, along cuts and side slopes which may never be mown, the shrub component will add diversity, beauty, and wildlife habitat to the roadside plantings. The mix may be applied by hydro-seeding, by mechanical spreader, or on small sites it can be spread by hand. Lightly rake, or roll to ensure proper seed to soil contact. Best results are obtained with a Spring seeding. Late Spring and early Summer seeding will benefit with a light mulching of weed-free straw to conserve moisture. If conditions are drier than usual, watering may be required. Late Fall and Winter dormant seeding require an increase in the seeding rate. Fertilization is not required unless the soils are particularly infertile. Preparation of a clean weed free seed bed is necessary for optimal results.

New England Wetland Plants, Inc. may modify seed mixes at any time depending upon seed availability. The design criteria and ecological function of the mix will remain unchanged.  
 Price is \$/bulk pound, FOB warehouse, plus S&H and applicable taxes.
