## **New England Roadside Matrix Upland Seed Mix**

| <b>Botanical Name</b>                                | <b>Common Name</b>       | <b>Indicator</b> |
|--|--------------------------|------------------|
| <i>Elymus virginicus</i>                             | Virginia Wild Rye        | FACW-            |
| <i>Desmodium paniculatum</i>                         | Panicleleaf Tick Trefoil |                  |
| <i>Schizachyrium scoparium</i>                       | Little Bluestem          | FACU             |
| <i>Andropogon gerardii</i>                           | Big Bluestem             | FAC              |
| <i>Festuca rubra</i>                                 | Red Fescue               | FACU             |
| <i>Sorghastrum nutans</i>                            | Indian Grass             | UPL              |
| <i>Panicum virgatum</i>                              | Switch Grass             | FAC              |
| <i>Rhus typhina</i>                                  | Staghorn Sumac           |                  |
| <i>Cornus racemosa</i>                               | Grey Dogwood             | FAC              |
| <i>Cornus amomum</i>                                 | Silky Dogwood            | FACW             |
| <i>Oenothera biennis</i>                             | Evening Primrose         | FACU-            |
| <i>Asclepias tuberosa</i>                            | Butterfly Milkweed       | NI               |
| <i>Rudbeckia hirta</i>                               | Black Eyed Susan         | FACU-            |
| <i>Chamaecrista fasciculata</i>                      | Partridge Pea            | FACU             |
| <i>Eupatorium fistulosum (Eutrochium fistulosum)</i> | Hollow-Stem Joe Pye Weed | FACW             |

PRICE PER LB. \$65.00 MIN. QUANTITY 1 LBS. TOTAL: \$65.00 APPLY: 35 LBS/ACRE :1250 sq ft/lb

The New England Roadside Matrix Mixes are designed for use along roads and highways. These mixes are unusual in that they contain native grasses, wildflowers, and shrubs that are blended together as a native matrix seed mix. In areas that receive frequent mowing, the cold season grasses will dominate, such as those areas closest to the roadway shoulder. In areas farther from the road, which may be mown only once each year, or in hard to mow areas, such as around sign posts, the wildflower component will become dominant. Along cuts and side slopes which may never be mown, the shrub component will add diversity and beauty to the roadside plantings. It is a particularly appropriate seed mix for roadsides, industrial sites, or cut and fill slopes. These mixes may be applied by hydroseeding, or by mechanical spreader. Always apply on a clean, weed-free seed bed. After sowing, lightly rake or roll the site to improve seed-to-soil contact. Best results are obtained with a mid-late spring seeding. Summer seeding will benefit from a light mulching of clean, weed-free straw to conserve soil moisture.

New England Wetland Plants, Inc. may modify seed mixes at any time depending upon seed availability. The design criteria and ecological function of the mix will remain unchanged. Price is \$/bulk pound, FOB warehouse, Plus SH and applicable taxes.
